Abstract:

KR 2002084619 A

NOVELTY A cosmetic composition containing a Vitis vinifera L. extract and a Phellinus linteus extract to provide an effect greater than an additive effect of two components is provided which has an excellent skin elasticity-enhancing effect and antioxidant effect as well as collagen synthesis and is effective in prevention and improvement of wrinkle formation.

DETAILED DESCRIPTION This cosmetic composition contains 0.01 to 20% by weight of an extract of Vitis vinifera L. and Phellinus linteus, wherein the Vitis vinifera L. extract and Phellinus linteus extract are mixed in a ratio of 1:0.01 to 1:20. The Phellinus linteus extract is obtained by adding the same volume of a mixed solution of ethanol, 1,3-butylene glycol, propylene glycol and distilled water as ground Phellinus linteus, heating at 85deg.C for 48hr and then filtering with a filter paper of 200 meshes. The Vitis vinifera L. extract is obtained by fermenting ground Vitis vinifera L. at 20 to 25deg.C for 6 to 8 days and then concentrating under reduced pressure.
